Current Problem

Current Problem

“ Develop one (or more) interactive museum exhibit(s) concerning the dilemmas people faced during the occupation of The Netherlands by Nazi Germany between 1940 and 1945. The exhibit has to be integrated into the permanent exhibition without disturbing the look and feel of the exhibition.”

Our Solution

2/6

Identification Rumble

An interactive and engaging experience

- Passive -> **Interactive**
- Smart replica for **interaction**
- Discuss**
- Evaluate**

User Interaction

3/6

User-Exhibit Interaction journey

Visit the Dutch Resistance Museum

Receive smart replica of an identity card

Activate your ID Card

against preferred language activation point

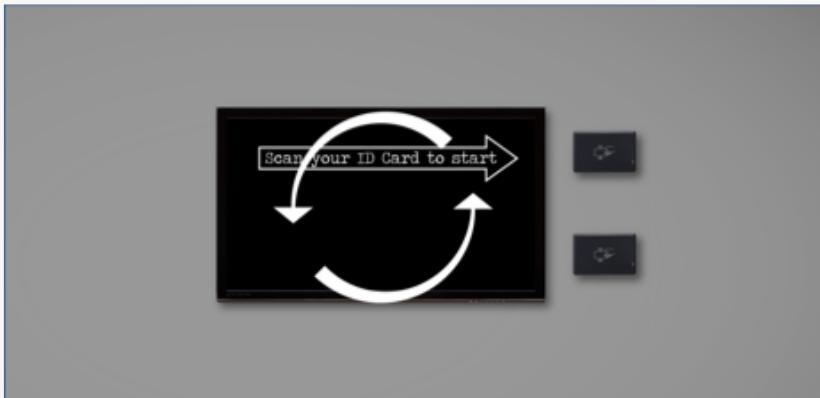

Arrive at Dilemma Station

scan ID Card to start animation

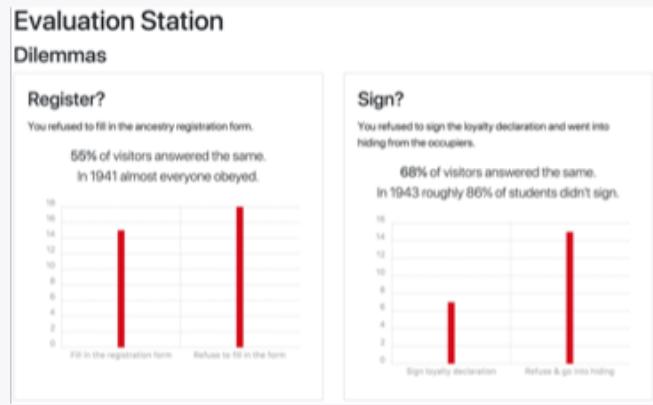

Watch the animation

scan ID Card again to answer the question

Repeat this process

12 dilemmas in the current exhibition

Find the Evaluation Station

get an overview of your choices, of other visitors **and** possible consequences

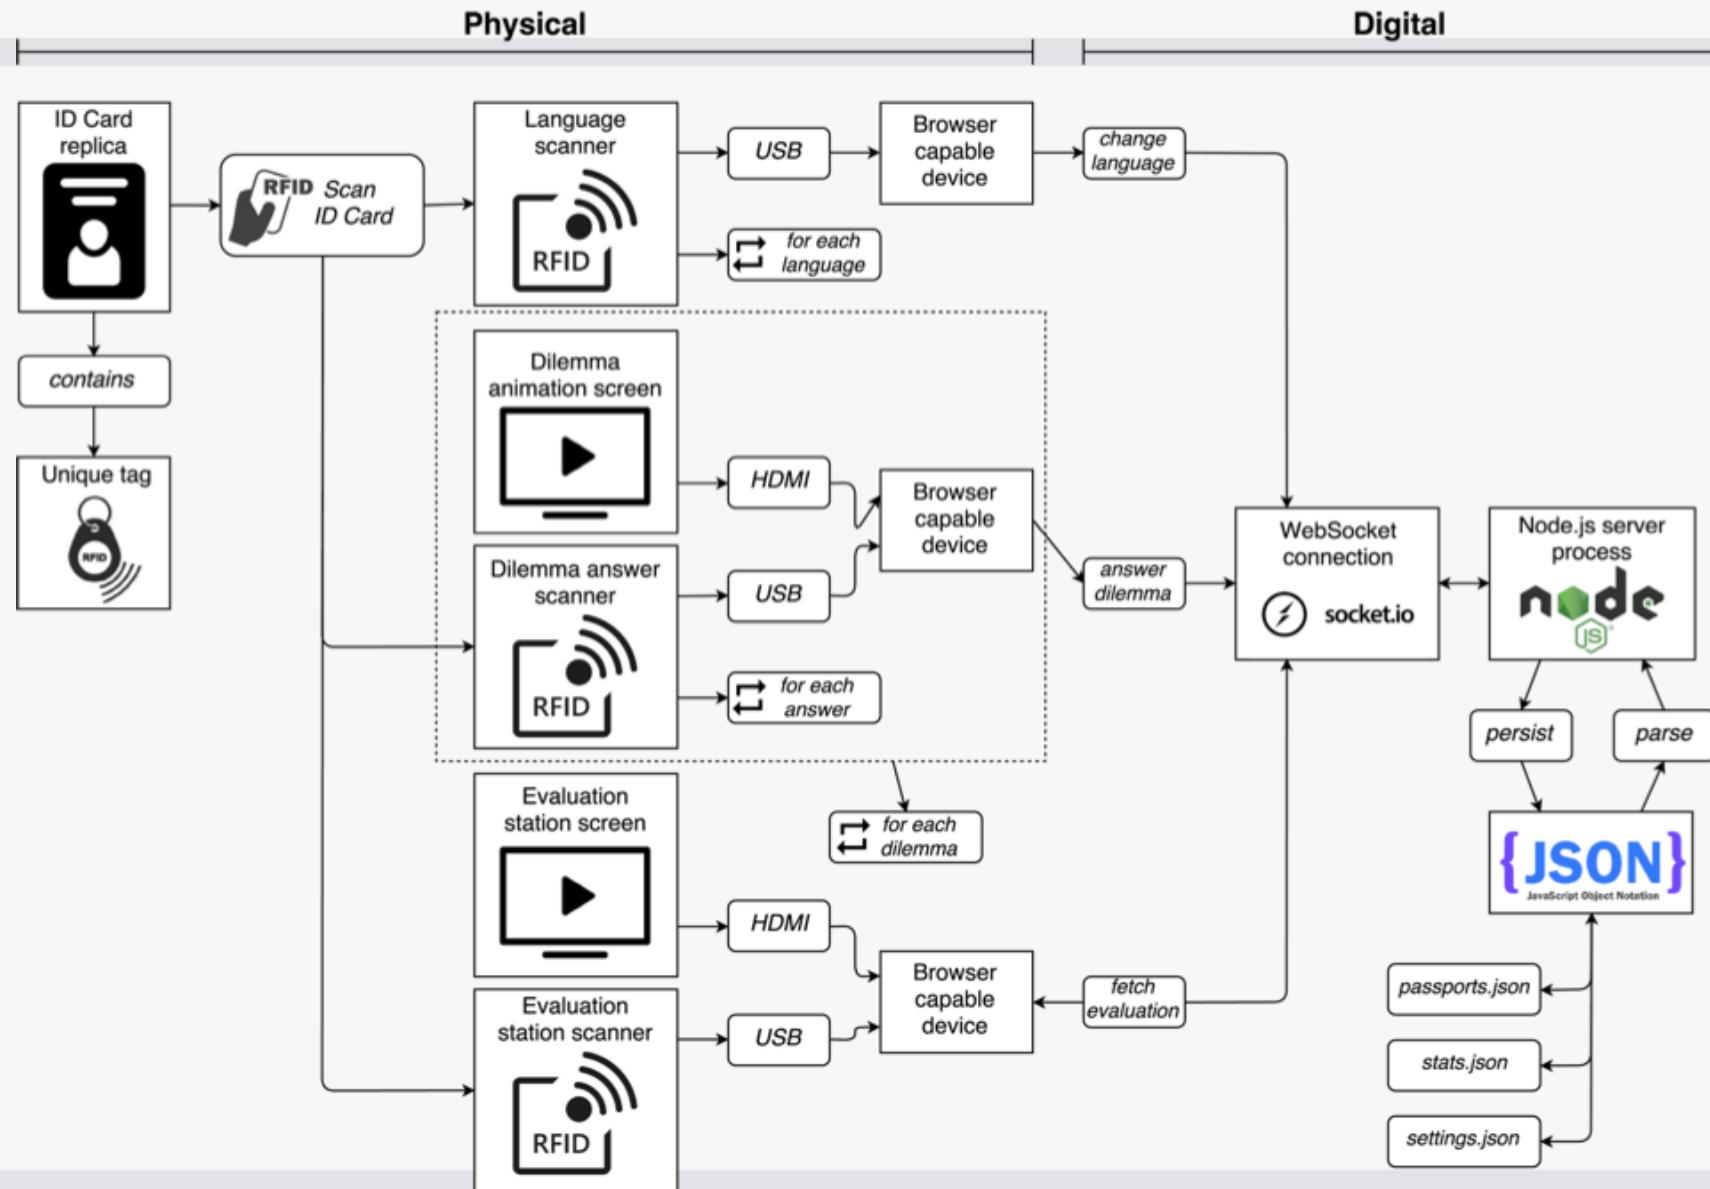

Hand your ID Card back in

TOT ZIENS!

System Development

Conclusion

6/6

Concluding...

- ❑ Scalability
- ❑ Future work
 - ❑ More animations
 - ❑ Multiple languages
- ❑ Recommendations
 - ❑ Implement progressively
